

SUFRESCA
AVOCADO

Fresh thinking *for fresh fruit*

Coating the impossible

We aim to offer food producers anywhere around the world, a simple, affordable and sustainable solution for prolonging the shelf life of fruit - helping create a plastic free world where costly food loss and waste are a thing of the past.

Natural edible coating

Water-based emulsion

Applied post-harvest at the packinghouse, creating an imperceptible dry coating

Natural & Biodegradable

Made of plant-based additives and naturally occurring organic compounds, our coatings are essentially food

Suitable for **organic produce**

In compliance with **EU regulation**

Natural-looking avocado that stays fresh longer

Sufresca ensures your avocados arrive at their destination safely, through the marketplace to consumers. Our coating slows down ripening, weight loss and subsequent degradation and decay, under cold, ambient, and changing conditions. Sufresca coated avocados can undergo artificial ripening and live on - ready-to-eat - for days and days.

No taste

No odour

Transparent

Ultra-thin

No excessive gloss

No texture

Easy to use

Sufresca requires no specialized equipment and dries quite fast. Any application line such as those commonly used for waxing or washing, will do. Our coating can be easily implemented in any packinghouse, big or small, anywhere in the world.

Typical application line commonly used

How does it work?

Based on our novel **COATECH** technology, Sufresca partially seals the skin to allow optimal exchange of gases between the fruit and the environment, such as oxygen, carbon dioxide and water vapor. This means that the avocado's internal atmosphere is modified to slow down postharvest natural processes, while avoiding the impairing effects of over-sealing.

Controlled Respiration ↔

Moisture stays in

SUFRESCA
AVOCADO

From Tree to Market

Better from the Start

Sufresca allows for less premature ripening, degradation, and overall losses during transit. It means better quality produce, a better position at the final point of sale, and additional market opportunities

Ripening

Sufresca does not disrupt the natural ripening or current artificial procedures

Ready-to-eat

Sufresca preserves the highest quality and creamy avocados. This means compliance with retailer demand - fewer in-store losses, no plastic packaging and a happier consumer
